

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claim 1 (Original): A graphical user interface comprising:

a selectable portion of a display screen related to a financial instrument;

a selectable tab for accessing a selectable portion of the display screen related to a forward position with respect to the financial instrument; and

wherein when the tab is selected, access is provided to the selectable portion of the display screen related to the forward position.

Claim 2 (Original): The graphical user interface of claim 1, wherein the portion of the display screen related to the financial instrument reflects market conditions for the financial instrument.

Claim 3 (Original): The graphical user interface of claim 1, wherein the portion of the display screen related to a financial instrument and the portion of the display screen related to the forward position each reflects market conditions related to the trading of the financial instrument.

Claim 4 (Original): The graphical user interface of claim 1, wherein the portion of the display screen related to a financial instrument and the portion of the display screen related to the forward position each reflects market conditions related to the trading of one of the forward positions.

Claim 5 (Original): The graphical user interface of claim 1, wherein the financial instrument is an interest-rate related instrument.

Claim 6 (Original): The graphical user interface of claim 1, further comprising a trading state and a forward position state.

Claim 7 (Currently Amended): The graphical user interface of claim 6, wherein, in the trading state, the selectable portion of a display screen related to a financial instrument and the selectable tab are displayed, and in the forward position state, the selectable portion of a display screen related to a financial instrument and the ~~short~~ forward position with respect to the financial instrument are displayed.

Claim 8 (Original): The graphical user interface of claim 1, wherein the selectable portion of the display screen related to a forward position with respect to the financial instrument is adapted to display a plurality of forward positions.

Claim 9 (Original): A graphical user interface comprising:

a selectable portion of a display screen related to a financial instrument;

a selectable tab for accessing a selectable portion of the display screen related to a non-standard settlement position with respect to the financial instrument; and

wherein when the tab is selected, access is provided to the selectable portion of the display screen related to the non-standard settlement position.

Claim 10 (Original): The graphical user interface of claim 9, wherein the portion of the display screen related to a financial instrument reflects market conditions for the financial instrument.

Claim 11 (Original): The graphical user interface of claim 9, wherein the portion of the display screen related to a financial instrument and the portion of the display screen related to the non-standard settlement position each reflects market conditions related to the trading of the financial instrument.

Claim 12 (Original): The graphical user interface of claim 9, wherein the portion of the display screen related to a financial instrument and the portion of the display screen related to the non-standard settlement position each reflects market conditions related to the trading of one of the non-standard settlement positions.

Claim 13 (Original): The graphical user interface of claim 9, wherein the financial instrument is an interest-rate related instrument.

Claim 14 (Original): The graphical user interface of claim 9, further comprising a trading state and a non-standard settlement position state.

Claim 15 (Currently Amended): The graphical user interface of claim 14, wherein, in the trading state, the selectable portion of a display screen related to a financial instrument and the selectable tab are displayed, and in the non-standard settlement position state, the selectable portion of a display screen related to a financial instrument and the ~~short~~ non-standard settlement position with respect to the financial instrument are displayed.

Claim 16 (Currently Amended): The graphical user interface of claim [[6]] 9, wherein the selectable portion of the display screen related to a non-standard settlement position with respect to the financial instrument is adapted to display a plurality of non-standard settlement positions.
